## 1 Introduction

National Nutrition Mission targets reduction in the level of under-nutrition and other related problems by ensuring convergence of various nutrition related schemes. The Mission will monitor and review implementation of all such schemes. In this endeavour, the Mission seeks to utilize existing structural arrangements of line Ministries wherever available. The NNM would primarily be a monitoring and reviewing body for taking stock of monitorable indicators of nutrition centric schemes/programmes requiring convergent actions for better and effective delivery to the targeted beneficiaries. Information and Communication Technology enabled Real Time Monitoring (ICT-RTM) will be one of the tools utilized for the above.

One of the key interventions of the project is the ICT-RTM of ICDS aimed at improving the service delivery system of ICDS. ICT-RTM driven by Common Application Software (ICDS-CAS) largely comprises of a mobile application installed on a smartphone for use by the Anganwadi Workers (AWWs) and the Sector Supervisors. The data captured by AWWs is available on the centralized web-based ICDS-CAS dashboard for monitoring and review across different administrative levels including Block, District, State and Centre

With the deployment of ICDS-CAS, the usage of 10 out of 11 ICDS registers by the Anganwadi Workers (AWWs) have been eliminated, thus improving the efficiencies in service delivery. The objective of this initiative are as follows:

- Name-based registration of ICDS beneficiaries in each AWC catchment area
- Improvement in AWW efficiency and effectiveness by embedding job aids and tools in their mobile phones (e.g. Nutrition Counseling of Pregnant Women, Infant and Young Child Feeding practices, etc.)
- Monitor timelines and quality of service delivered to the beneficiaries by AWW
- Availability of reports and dashboards with information to various stakeholders for prompt action and decision-making

This document is a user-manual for the ICDS-CAS Dashboard and has been designed to help the Government at all levels (National Level to the Block level). This manual will enable the user to use the ICDS-CAS Dashboard on their computers to view real time information collected by the Anganwadi workers on their phones and provide timely supportive supervision. The six tier reporting structure enabled by ICDS-CAS is provided in Figure 1 below:

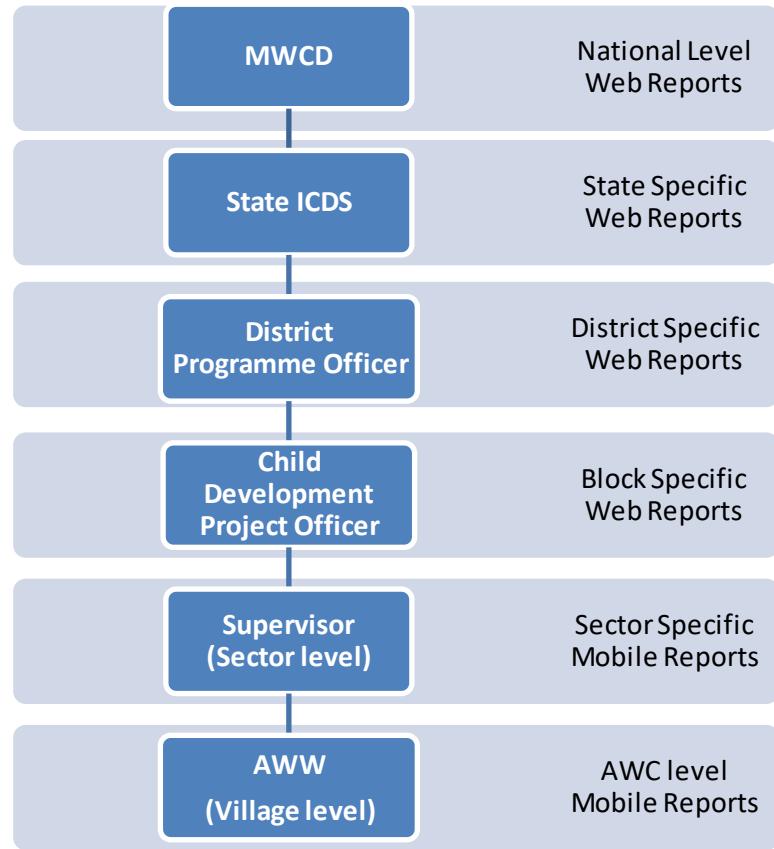

Figure 1: Dashboard Reporting Structure

## 2 ICDS-CAS Dashboard

The ICDS-CAS Dashboard has been created for use by MWCD officials at the National, State, District and Block Levels to be able to access real time information in order to:

1. View raw data submitted by AWWs and Lady Supervisors in a useful and easily understandable manner
2. Monitor and evaluate ICDS indicators in order to view progress and identify problem areas
3. Supervise the functioning of the ICDS program
4. Make prompt data-driven decisions to improve service delivery

In the Figure 2 below, a high level process flow of data collection from the end beneficiaries to the Dashboard has been depicted.

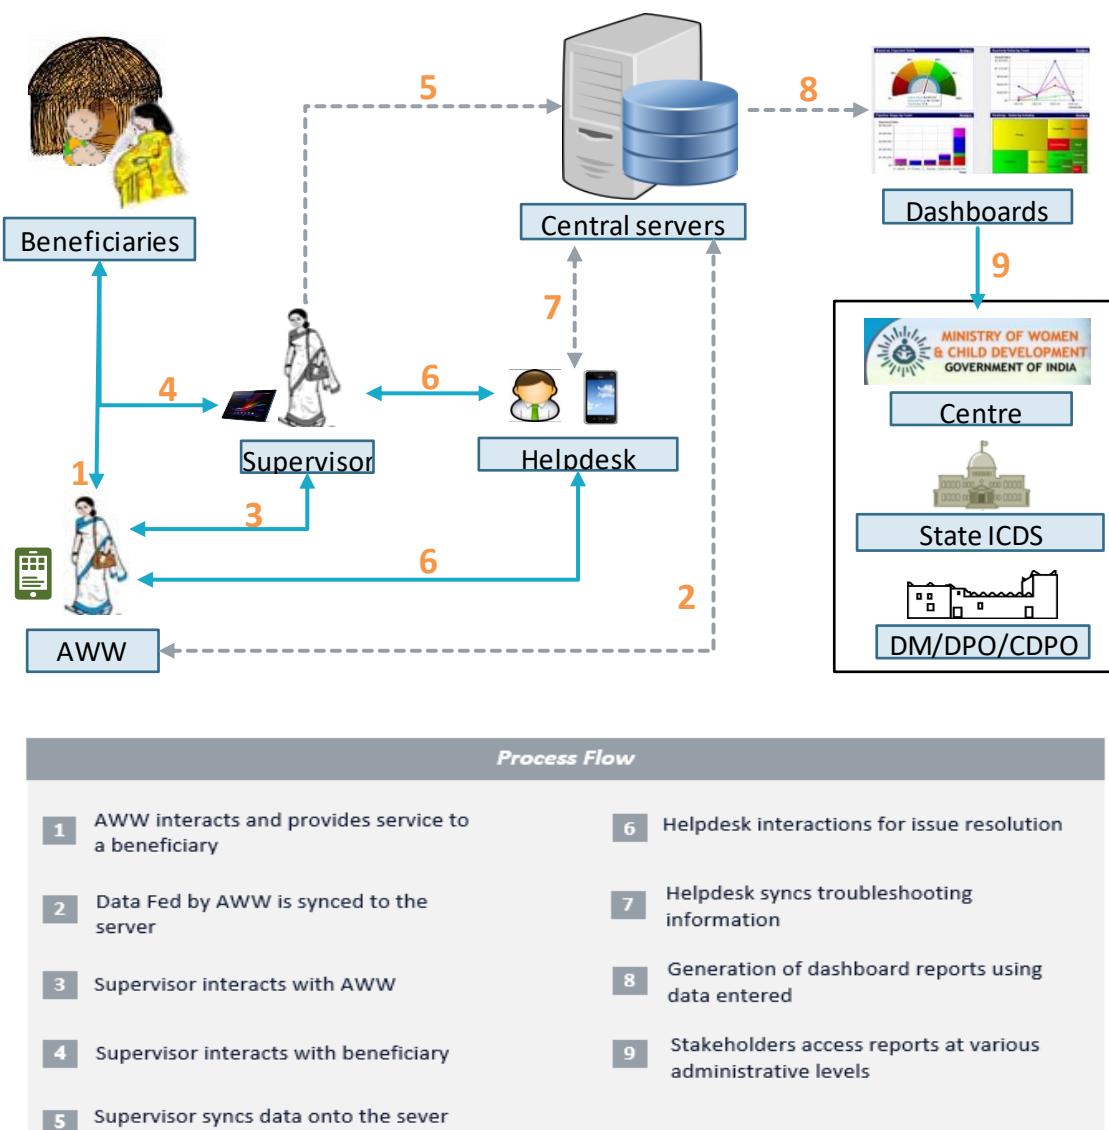

Figure 2: Data Process Flow

### **When is data being sent to the server?**

1. Data is sent to the central servers to update the Dashboards in real time (as user syncs with server)
2. Reports displayed on the dashboards will be updated once a day (Midnight IST) with data from forms submitted by AWWs and Supervisors.
3. Data will be displayed in accordance to the reporting period (i.e. monthly data)
4. Dashboard users may view up-to-date data at any time. However, to gather the most accurate picture of the ICDS program at the beginning of a month, dashboard users must view data for the previous month.

### 3 Log-in instructions for the ICDS-CAS Dashboard

The ICDS-CAS Dashboard is a web based system. Each dashboard user will be given a username and password. The URL for accessing ICDS-CAS Dashboard is: [www.icds-cas.gov.in/a/icds-cas](http://www.icds-cas.gov.in/a/icds-cas). Navigate to this URL on your web browser.

**Note:** The most suitable browser to view Dashboards is Google Chrome or Mozilla Firefox.

1. You will be prompted to sign in
2. Enter the dashboard username and password as communicated to you
3. Click on Reports -->ViewAll
4. Click on 'Dashboard ICDS-CAS' to view the Dashboard

Figure 3: Login Page

## 4 Navigating the ICDS-CAS Dashboard

Program Summary will be the default selection on the landing page of the dashboard. Each page of the dashboard displays data based on the administrative level of the user who logs in.

## 5 Program Summary

The section shows a consolidated snapshot of all the indicators in the form of Key Performance Indicator (KPI) cards. The user is able to view data for current or previous months by using the 'Select Month/Year' filter and/or can view data for various locations by using the 'Select Location' filter. For example—A State level user can drill down to District / Block / Sector / AWC but will not be able to view National level data.

**Select Month / Year:** The user can click on the time filter as shown in the figure below and select the Month / Year for which the user intends to view the data and click on 'Apply'. All the data on the page will change according to the selected time period. In order to gather the most accurate scenario at the beginning of a month, the user should view data for the previous month.

**Select Location:** The user can click on 'Location' as shown in the figure below and select the administrative level for which the user intends to view the data and click on 'Apply'

If the user selects an Anganwadi Centre (AWC) level, the dashboard will direct the user to the 'AWC Report' which is explained in detail in Section 10.

## 17 Dashboard Usage Checklist

This section outlines the activities which need to be undertaken by dashboard users on daily, weekly and monthly basis for effective monitoring of ICDS program.

### Daily

- Review Program Summary and note whether data is increasing or decreasing.
- For indicators that are decreasing, view the Map/Chart view to look at trends.
- Go to the Chart view page and view top and bottom performing locations under your administrative level.
- Follow up with these locations to understand reasons for poor performance and identify areas for support.

### Weekly

- Use the Map View to see if there are certain areas performing better than others.
- Consider if there are factors specific to those geographic areas influencing the trends.
- Use the Chart View to see how the indicator has changed in the past four months. If there has been a consistent negative trend or significant negative change in the indicator.
- Investigate the reasons for this change.
- Follow up with the respective location leaders to offer support.

### Monthly

- Review ICDS-CAS Fact Sheets to see how the current month's progress compares to the past two months.
- Select priority indicators to address in the coming month. Share information about these indicators with your team so they have context on the problem.
  - See Map View to show the status of the indicator across geographic areas.
  - See Chart View to see historical trends on the indicator.
- Make a plan for addressing service delivery indicators that are stagnant or worsening over time.
  - Work with the ICDS team in your administrative area to identify the service delivery inputs that would lead to improved performance on outcomes indicators.
  - Set reasonable targets for improvement. Remember that some indicators will be slower to change than others. Some short-term targets could include increasing the number of AWCs open daily, a high percentage of PSE attendance, and weighing efficiency.
  - Agree on goals for service delivery improvement with the ICDS team in your administrative area.
  - Set up a time to review your progress on this month's goals.

## 18 Decision Making through Dashboard

The ICDS-CAS Dashboard display data and provides reports on various program areas for administrative officers to interpret as they see fit to the program. This section of the manual aims to provide some support to administrative officials on how to interact with and understand the various data points and reports available on the dashboard in order to make data-driven decisions in the ICDS program.

In order to provide a detailed understanding of how to navigate the dashboard for use in decision-making to improve service delivery of the ICDS program, two use-cases are presented here:

### **Use Case 1: State Project Management Unit (AWC Infrastructure)**

**Scenario:** SPMU wishes to complete procurement of weighing scales. In order to do so, the SPMU team uses the ICDS-CAS Dashboard to investigate the current status of weighing scales available at AWCs in the State. How can the team access this information from the dashboard?

#### **Steps to be followed on the Dashboard:**

- View State-level Program Summary for AWC Infrastructure to follow up on procurements of scales that were made for several Districts.
- Select “See more” to see District-level data on a Map View.

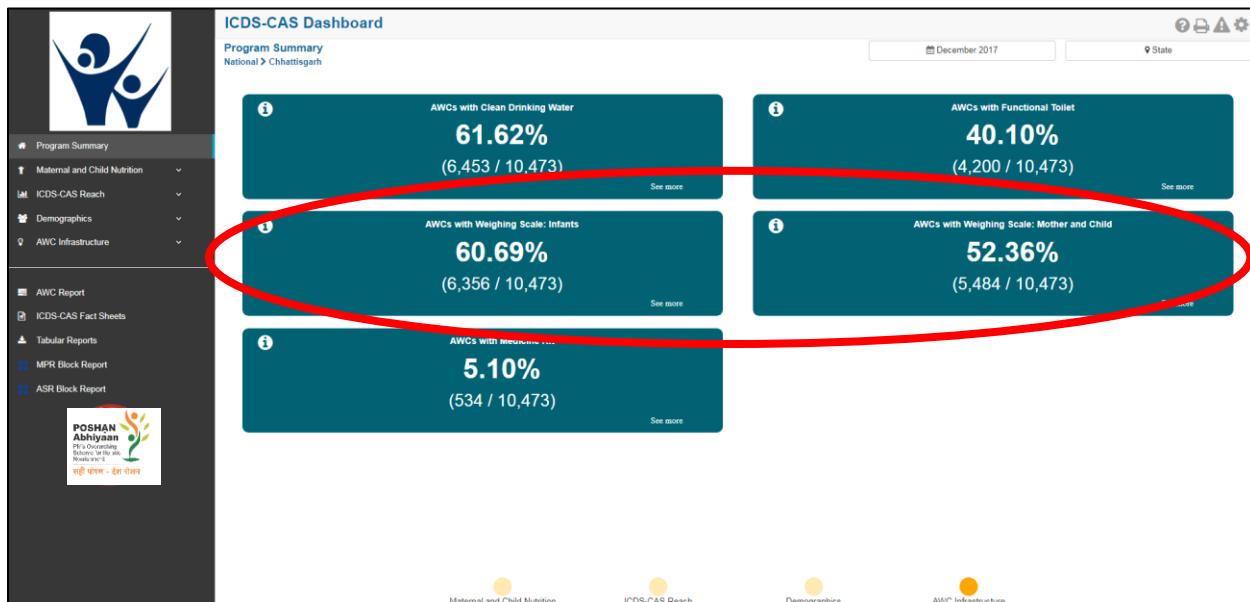

Figure 148: Use Case 1

- Switch to Chart View to see a ranking of top- and bottom-performing Districts.
- Contact lowest-performing Districts to investigate potential bottle necks in the distribution of scales.
- Encourage District officials to ensure that AWWs are completing the Infrastructure Details form in the ICDS-CAS application.

## Use Case 2: District Program Officer (AWW Performance)

**Scenario:** DPO wishes to monitor the performance of AWWs and follow up with low performing workers. How can the DPO access this information from the dashboard?

### Steps to be followed on the Dashboard:

- Views District-level Program Summary for Maternal and Child Nutrition.
- Notice that the indicator Early Initiation of Breastfeeding is very low.
- Select “See more” to see the data on a Map View. Drill down to the Block that shows the lowest percentage of Early Initiation of Breastfeeding.
